

smartCLICK - System design

Key features

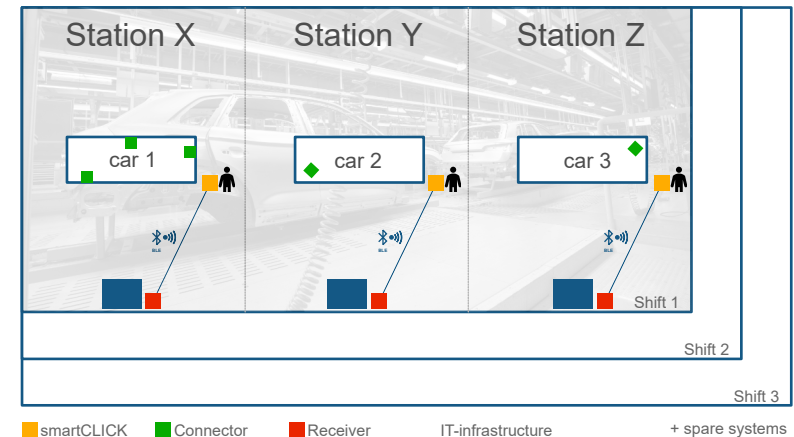

- High recognition rate
- System can be trained for any latch connector type
- **Operates independently of environmental conditions**
- Battery life > 8 hours
- System can be used with any work glove
- Analytics on device
- robust system design
- Wireless & Easy-to-use

Architecture

Setup (e.g. Automotive)

Current **use-case**: "In-station process control to improve first-time-through (FTT)" (at end-of-line inspection)

This system is not suitable for replacing quality processes
